Journal of
Materials
Processing
Technology

www.elsevier.com/locate/jmatprotec

Subject Index of Volumes 173

AA6082
The effect of processing and Mn content on the T5 and T6 properties of AA6082 profiles, 84
Abrasive wear
Abrasive wear resistance of boronized carbon and low-alloy steels, 352
Acoustic emission
Performance enhancement through microwave irradiation of K20 carbide tool machining Al/SiC metal matrix composite, 185
Activity model
Activity model and computer aided system for defining sheet metal process planning, 213
Adaptive mesh
An adaptive FEA method to predict surface quality in hard machining, 21
Adhesion
Characterization and micro- and ultra-structural analysis of PET-based Co-rolled composite electrolytic chromium coated steel (ECCS), 34
Al_2O_3
Sol–gel processing of alumina fibres, 275
Alumina
A new technology in surface finishing: Fluidized bed machining (FBM) of aluminium alloys, 157
2117-T4 aluminum alloy
Constitutive model of the alloy 2117-T4 at low strain rates and temperatures, 252
Aluminum droplet
Freeform fabrication of aluminum parts by direct deposition of molten aluminum, 209
Analytical model
An experimental and analytical study on dome forming of seamless Al tube by spinning process, 145
ANFIS
Application of ANFIS for inverse prediction of hole profile in the square hole bore-expanding process, 136
Austempered ductile iron (ADI)
Evaluation of machinability of austempered ductile irons in terms of cutting forces and surface quality, 260
The effect of copper additions to the mechanical properties of austempered ductile iron (ADI), 269
Automotive applications
The effect of processing and Mn content on the T5 and T6 properties of AA6082 profiles, 84

Bevel gears
New forging method of bevel gears from structural steel, 75
BK7 glass
Studies on cut-off grinding of BK7 optical glass using thin diamond wheels, 321
Bond strength
Weld procedural effect on the performance of iron based hardfacing deposits on cast iron substrate, 61
Bonding strength
ESEM evaluation of Inconel-625 thermal spray coating (HVOF) onto stainless steel and carbon steel post brine exposure after tensile tests, 44
Boriding
Abrasive wear resistance of boronized carbon and low-alloy steels, 352
Boronizing
Abrasive wear resistance of boronized carbon and low-alloy steels, 352
Boss thickness
An experimental and analytical study on dome forming of seamless Al tube by spinning process, 145

Carbon and oxygen control
Powder injection molding of Ti–6Al–4V alloy, 310
Carbon/carbon fibers
CO_2 laser cutting of a carbon/carbon multi-lamelled plain-weave structure, 345
Cast iron
Weld procedural effect on the performance of iron based hardfacing deposits on cast iron substrate, 61
Ceramic cutting tools
The effect of tool wear on tool life of alumina-based ceramic cutting tools while machining hardened martensitic stainless steel, 151
Chatter
Chatter analysis of robotic machining process, 301
Chip
Assessment of chip-breaking characteristics using new chip-breaking index, 166
Chip breaker
Assessment of chip-breaking characteristics using new chip-breaking index, 166
Chip former
Assessment of chip-breaking characteristics using new chip-breaking index, 166
Chip-breaking cycle time
Assessment of chip-breaking characteristics using new chip-breaking index, 166
Chip-breaking index
Assessment of chip-breaking characteristics using new chip-breaking index, 166
Coating
ESEM evaluation of Inconel-625 thermal spray coating (HVOF) onto stainless steel and carbon steel post brine exposure after tensile tests, 44
Cold compaction
The influence of MoS_2 additions on the densification of water-atomized HSS powders, 291

Elsevier B.V.
doi:10.1016/S0924-0136(06)00118-X

Cold-rolling
Transfer of surface texture from silicon nitride rolls to stainless steel wire in cold-rolling, 394
Component-wise splitting method
Numerical methods to improve the computational efficiency of solidification simulation for the investment casting process, 70
Composite
Characterization and micro- and ultra-structural analysis of PET-based Co-rolled composite electrolytic chromium coated steel (ECCS), 34
Composite self-lubricating high-speed steels
The influence of MoS_2 additions on the densification of water-atomized HSS powders, 291
Computer aided process planning
Activity model and computer aided system for defining sheet metal process planning, 213
Copper additions
The effect of copper additions to the mechanical properties of austempered ductile iron (ADI), 269
Corrosion
ESEM evaluation of Inconel-625 thermal spray coating (HVOF) onto stainless steel and carbon steel post brine exposure after tensile tests, 44
Cr/C ratio
Weld procedural effect on the performance of iron based hardfacing deposits on cast iron substrate, 61
Cracking sensitivity
Weld procedural effect on the performance of iron based hardfacing deposits on cast iron substrate, 61
Cross wedge rolling
Finite element analysis of cross wedge rolling, 201
Cut-off grinding
Studies on cut-off grinding of BK7 optical glass using thin diamond wheels, 321
Cutting
CO_2 laser cutting of a carbon/carbon multi-lamelled plain-weave structure, 345
Cutting forces
Performance enhancement through microwave irradiation of K20 carbide tool machining Al/SiC metal matrix composite, 185
Evaluation of machinability of austempered ductile irons in terms of cutting forces and surface quality, 260
Chatter analysis of robotic machining process, 301
Cutting parameter optimization
Approach to optimization of cutting conditions by using artificial neural networks, 281
Cylinder upsetting
Constitutive model of the alloy 2117-T4 at low strain rates and temperatures, 252

Damage
Optimisation of springback predicted by experimental and numerical approach by using response surface methodology, 101
On the stochastic deformation process in a randomly structured polycrystalline solid, 240
Decision support system
Activity model and computer aided system for defining sheet metal process planning, 213
Deformation
On the stochastic deformation process in a randomly structured polycrystalline solid, 240
Delamination
The effect of copper additions to the mechanical properties of austempered ductile iron (ADI), 269
Densification
Performance enhancement through microwave irradiation of K20 carbide tool machining Al/SiC metal matrix composite, 185
Die design
A new design for equal channel angular extrusion, 29
Diode laser
Advance in paint stripping from aluminium substrates, 232
Dome forming
An experimental and analytical study on dome forming of seamless Al tube by spinning process, 145
Drawing processes
Activity model and computer aided system for defining sheet metal process planning, 213
Ductile metals
A new technology in surface finishing: Fluidized bed machining (FBM) of aluminium alloys, 157

ECAE
A new design for equal channel angular extrusion, 29
ECAP
A new design for equal channel angular extrusion, 29
End closure of tube
An experimental and analytical study on dome forming of seamless Al tube by spinning process, 145
Equal channel angular extrusion
A new design for equal channel angular extrusion, 29
Equal channel angular pressing
Candidature of equal channel angular pressing for processing of tubular commercial purity-titanium, 53
Experimental design
Optimisation of springback predicted by experimental and numerical approach by using response surface methodology, 101

Fabrics
Fabric surface properties affected by low temperature plasma treatment, 172
FATT
Effect of nickel and molybdenum additions on weld metal toughness in a submerged arc welded HSLA line-pipe steel, 92
FE analysis
A non-steady state FE analysis of Al tubes hot extrusion by a porthole die, 223
Fe_2B phase
Abrasive wear resistance of boronized carbon and low-alloy steels, 352
FEA
An adaptive FEA method to predict surface quality in hard machining, 21
FEM
Design of over-crown in sheet metal stamping using finite element method, 14
Finite element analysis of cross wedge rolling, 201
FEM simulation
Optimisation of springback predicted by experimental and numerical approach by using response surface methodology, 101
Fibres
Sol–gel processing of alumina fibres, 275
Finite element analysis
Theoretical prediction and FEM analysis of superplastic forming of AA7475 aluminum alloy in a hemispherical die, 247
Fluidized bed machining (FBM)
A new technology in surface finishing: Fluidized bed machining (FBM) of aluminium alloys, 157
Forming pressure
Theoretical prediction and FEM analysis of superplastic forming of AA7475 aluminum alloy in a hemispherical die, 247
Fuzzy expert system
Design of genetic-fuzzy expert system for predicting surface finish in ultra-precision diamond turning of metal matrix composite, 337

Genetic algorithms
Design of genetic-fuzzy expert system for predicting surface finish in ultra-precision diamond turning of metal matrix composite, 337
Multi-objective optimization of a two-dimensional cutting problem using genetic algorithms, 384
Glass beads
A new technology in surface finishing: Fluidized bed machining (FBM) of aluminium alloys, 157
Guillotine cutting
Multi-objective optimization of a two-dimensional cutting problem using genetic algorithms, 384

Hansel–Spittel constitutive model
Constitutive model of the alloy 2117-T4 at low strain rates and temperatures, 252
Hardfacing deposits
Weld procedural effect on the performance of iron based hardfacing deposits on cast iron substrate, 61
High-temperature properties
Use of micromechanical modelling in the material characterisation of overinjected thermoplastic composites, 376
Hot extrusion
A non-steady state FE analysis of Al tubes hot extrusion by a porthole die, 223
HSLA
Effect of nickel and molybdenum additions on weld metal toughness in a submerged arc welded HSLA line-pipe steel, 92
HVOF
ESEM evaluation of Inconel-625 thermal spray coating (HVOF) onto stainless steel and carbon steel post brine exposure after tensile tests, 44
Hydrogen embrittlement
Practical numerical analysis of a crack near a weld subjected to primary loading and hydrogen embrittlement, 1

Impact toughness
Effect of nickel and molybdenum additions on weld metal toughness in a submerged arc welded HSLA line-pipe steel, 92
Inconel 182
Stress corrosion cracking sealing in overlaying of Inconel 182 by laser surface melting, 330
Inverse prediction
Application of ANFIS for inverse prediction of hole profile in the square hole bore-expanding process, 136
Investment casting
Numerical methods to improve the computational efficiency of solidification simulation for the investment casting process, 70

Kerf width size
CO_2 laser cutting of a carbon/carbon multi-lamelled plain-weave structure, 345
Kinematic hardening
Simulation of springback and wrinkling in stamping of a dual phase steel rail-shaped part, 178
KOBO forging
New forging method of bevel gears from structural steel, 75

Large deformation
An experimental and analytical study on dome forming of seamless Al tube by spinning process, 145
Laser surface melting
Stress corrosion cracking sealing in overlaying of Inconel 182 by laser surface melting, 330
Line pipe steel
Effect of nickel and molybdenum additions on weld metal toughness in a submerged arc welded HSLA line-pipe steel, 92

Machinability
Evaluation of machinability of austempered ductile irons in terms of cutting forces and surface quality, 260
Machining
Approach to optimization of cutting conditions by using artificial neural networks, 281
Machining properties
The machining properties of some hardwoods and softwoods naturally grown in Eastern Black Sea Region of Turkey, 315
Martensitic stainless steel
The effect of tool wear on tool life of alumina-based ceramic cutting tools while machining hardened martensitic stainless steel, 151
Mass loss
A new technology in surface finishing: Fluidized bed machining (FBM) of aluminium alloys, 157
Mechanical properties
Powder injection molding of Ti–6Al–4V alloy, 310
Metal
Characterization and micro- and ultra-structural analysis of PET-based Co-rolled composite electrolytic chromium coated steel (ECCS), 34
Metal cutting
An adaptive FEA method to predict surface quality in hard machining, 21
Approach to optimization of cutting conditions by using artificial neural networks, 281
Multi-objective optimization of a two-dimensional cutting problem using genetic algorithms, 384
Metal matrix composite
Design of genetic-fuzzy expert system for predicting surface finish in ultra-precision diamond turning of metal matrix composite, 337
Micromechanics
On the stochastic deformation process in a randomly structured polycrystalline solid, 240
Use of micromechanical modelling in the material characterisation of overinjected thermoplastic composites, 376
Microscopy
Characterization and micro- and ultra-structural analysis of PET-based Co-rolled composite electrolytic chromium coated steel (ECCS), 34
Microstructure and mechanical properties
The influence of MoS_2 additions on the densification of water-atomized HSS powders, 291
Microwave radiation
Performance enhancement through microwave irradiation of K20 carbide tool machining Al/SiC metal matrix composite, 185
Mode coupling
Chatter analysis of robotic machining process, 301
Modelling
On the stochastic deformation process in a randomly structured polycrystalline solid, 240
Molybdenum disulphide
The influence of MoS_2 additions on the densification of water-atomized HSS powders, 291
Mortising
The machining properties of some hardwoods and softwoods naturally grown in Eastern Black Sea Region of Turkey, 315
MRR
Ultrasonic machining of titanium and its alloys: A review, 125
Multi-objective optimization
Multi-objective optimization of a two-dimensional cutting problem using genetic algorithms, 384
Multiple regression analysis
The effect of tool wear on tool life of alumina-based ceramic cutting tools while machining hardened martensitic stainless steel, 151

Nelder and Mead simplex method
Set-up optimization for tandem cold mills: A case study, 368
Net droplet-based manufacturing
Freeform fabrication of aluminum parts by direct deposition of molten aluminum, 209
Neural network algorithm
Approach to optimization of cutting conditions by using artificial neural networks, 281
Nickel based superalloys
An analysis of the residual stresses generated in Inconel 718™ when turning, 359
Non-steady state
A non-steady state FE analysis of Al tubes hot extrusion by a porthole die, 223
Numerical simulation
Numerical methods to improve the computational efficiency of solidification simulation for the investment casting process, 70

Objective measurement
Fabric surface properties affected by low temperature plasma treatment, 172
Office paper
Desktop paper recycling: A survey of novel technologies that might recycle office paper within the office, 111
Optimization
Optimisation of springback predicted by experimental and numerical approach by using response surface methodology, 101
A pragmatic approach for optimal selection of plant-specific process plans in a virtual enterprise, 194
Over-crown prediction
Design of over-crown in sheet metal stamping using finite element method, 14

Paint stripping
Advance in paint stripping from aluminium substrates, 232
Partner selection
A pragmatic approach for optimal selection of plant-specific process plans in a virtual enterprise, 194
PIM
Powder injection molding of Ti–6Al–4V alloy, 310
Planing
The machining properties of some hardwoods and softwoods naturally grown in Eastern Black Sea Region of Turkey, 315
Plasma treatment
Effects of gas composition during plasma modification of polyester fabrics, 40
Fabric surface properties affected by low temperature plasma treatment, 172
Polycrystalline solid
On the stochastic deformation process in a randomly structured polycrystalline solid, 240
Polyester fabrics
Effects of gas composition during plasma modification of polyester fabrics, 40
Polymer
Characterization and micro- and ultra-structural analysis of PET-based Co-rolled composite electrolytic chromium coated steel (ECCS), 34
Porosity defect
Numerical methods to improve the computational efficiency of solidification simulation for the investment casting process, 70
Porthole die
A non-steady state FE analysis of Al tubes hot extrusion by a porthole die, 223
Pressure vessels
Practical numerical analysis of a crack near a weld subjected to primary loading and hydrogen embrittlement, 1
An experimental and analytical study on dome forming of seamless Al tube by spinning process, 145
Process maps
Advance in paint stripping from aluminium substrates, 232
Process planning
A pragmatic approach for optimal selection of plant-specific process plans in a virtual enterprise, 194
Process stability
Finite element analysis of cross wedge rolling, 201
Processing
The effect of processing and Mn content on the T5 and T6 properties of AA6082 profiles, 84

Reactive supersolidus liquid-phase sintering
The influence of MoS_2 additions on the densification of water-atomized HSS powders, 291
Recycling
Desktop paper recycling: A survey of novel technologies that might recycle office paper within the office, 111
Removal depth
Advance in paint stripping from aluminium substrates, 232
Residual stress
Practical numerical analysis of a crack near a weld subjected to primary loading and hydrogen embrittlement, 1
An analysis of the residual stresses generated in Inconel 718™ when turning, 359
Response surface technique
Optimisation of springback predicted by experimental and numerical approach by using response surface methodology, 101
Robotic machining
Chatter analysis of robotic machining process, 301

Sanding
The machining properties of some hardwoods and softwoods naturally grown in Eastern Black Sea Region of Turkey, 315
Scanning electron micrograph
Performance enhancement through microwave irradiation of K20 carbide tool machining Al/SiC metal matrix composite, 185
SCC sealing
Stress corrosion cracking sealing in overlaying of Inconel 182 by laser surface melting, 330
SEM testing
Fabric surface properties affected by low temperature plasma treatment, 172
Set-up optimization
Set-up optimization for tandem cold mills: A case study, 368
Severe plastic deformation
Candidature of equal channel angular pressing for processing of tubular commercial purity-titanium, 53
Shaping
The machining properties of some hardwoods and softwoods naturally grown in Eastern Black Sea Region of Turkey, 315
Sheet metal processes
Activity model and computer aided system for defining sheet metal process planning, 213
Sheet metal stamping
Design of over-crown in sheet metal stamping using finite element method, 14
Sheet metals
Optimisation of springback predicted by experimental and numerical approach by using response surface methodology, 101
Silicon nitride
Transfer of surface texture from silicon nitride rolls to stainless steel wire in cold-rolling, 394
Sintering
Sol–gel processing of alumina fibres, 275

Slurry temperature
Ultrasonic machining of titanium and its alloys: A review, 125
Sol–gel process
Sol–gel processing of alumina fibres, 275
Solid freeform fabrication
Freeform fabrication of aluminum parts by direct deposition of molten aluminum, 209
Specific cutting energy
Assessment of chip-breaking characteristics using new chip-breaking index, 166
Spectroscopy
Characterization and micro- and ultra-structural analysis of PET-based Co-rolled composite electrolytic chromium coated steel (ECCS), 34
Spinning
An experimental and analytical study on dome forming of seamless Al tube by spinning process, 145
Springback
Design of over-crown in sheet metal stamping using finite element method, 14
Optimisation of springback predicted by experimental and numerical approach by using response surface methodology, 101
Springback and wrinkling prediction
Simulation of springback and wrinkling in stamping of a dual phase steel rail-shaped part, 178
Square hole bore-expanding process
Application of ANFIS for inverse prediction of hole profile in the square hole bore-expanding process, 136
Stamping
Simulation of springback and wrinkling in stamping of a dual phase steel rail-shaped part, 178
Static explicit finite element simulation
Simulation of springback and wrinkling in stamping of a dual phase steel rail-shaped part, 178
Stochastic
On the stochastic deformation process in a randomly structured polycrystalline solid, 240
Strain state
Finite element analysis of cross wedge rolling, 201
Strain-rate
Theoretical prediction and FEM analysis of superplastic forming of AA7475 aluminum alloy in a hemispherical die, 247
Stress corrosion cracking
Stress corrosion cracking sealing in overlaying of Inconel 182 by laser surface melting, 330
Structural steel
New forging method of bevel gears from structural steel, 75
Structure model
Chatter analysis of robotic machining process, 301
Structures
Characterization and micro- and ultra-structural analysis of PET-based Co-rolled composite electrolytic chromium coated steel (ECCS), 34
Submerged arc weld
Effect of nickel and molybdenum additions on weld metal toughness in a submerged arc welded HSLA line-pipe steel, 92
Superplastic forming
Theoretical prediction and FEM analysis of superplastic forming of AA7475 aluminum alloy in a hemispherical die, 247
Surface finish
Ultrasonic machining of titanium and its alloys: A review, 125
Design of genetic-fuzzy expert system for predicting surface finish in ultra-precision diamond turning of metal matrix composite, 337
Surface integrity
An adaptive FEA method to predict surface quality in hard machining, 21
An analysis of the residual stresses generated in Inconel 718™ when turning, 359
Surface preparation
ESEM evaluation of Inconel-625 thermal spray coating (HVOF) onto stainless steel and carbon steel post brine exposure after tensile tests, 44
Surface roughness
A new technology in surface finishing: Fluidized bed machining (FBM) of aluminium alloys, 157
Fabric surface properties affected by low temperature plasma treatment, 172
Evaluation of machinability of austempered ductile irons in terms of cutting forces and surface quality, 260
Transfer of surface texture from silicon nitride rolls to stainless steel wire in cold-rolling, 394
Surface transfer
Transfer of surface texture from silicon nitride rolls to stainless steel wire in cold-rolling, 394

Tandem cold rolling
Set-up optimization for tandem cold mills: A case study, 368
Temperature filed
Numerical methods to improve the computational efficiency of solidification simulation for the investment casting process, 70
Texture
Transfer of surface texture from silicon nitride rolls to stainless steel wire in cold-rolling, 394
Thermomechanical
Use of micromechanical modelling in the material characterisation of overinjected thermoplastic composites, 376
Thin diamond wheel
Studies on cut-off grinding of BK7 optical glass using thin diamond wheels, 321
Ti–6Al–4V
Powder injection molding of Ti–6Al–4V alloy, 310
Time-evolution
On the stochastic deformation process in a randomly structured polycrystalline solid, 240
Titanium
Ultrasonic machining of titanium and its alloys: A review, 125
Toner
Desktop paper recycling: A survey of novel technologies that might recycle office paper within the office, 111
Tool life
The effect of tool wear on tool life of alumina-based ceramic cutting tools while machining hardened martensitic stainless steel, 151
Tool wear
The effect of tool wear on tool life of alumina-based ceramic cutting tools while machining hardened martensitic stainless steel, 151
Turning
The machining properties of some hardwoods and softwoods naturally grown in Eastern Black Sea Region of Turkey, 315
An analysis of the residual stresses generated in Inconel 718™ when turning, 359

Ultra-precision diamond turning
Design of genetic-fuzzy expert system for predicting surface finish in ultra-precision diamond turning of metal matrix composite, 337
Ultrasonic machining
Ultrasonic machining of titanium and its alloys: A review, 125

Virtual organization
A pragmatic approach for optimal selection of plant-specific process plans in a virtual enterprise, 194

Viscoplasticity
Constitutive model of the alloy 2117-T4 at low strain rates and temperatures, 252

Wear
Studies on cut-off grinding of BK7 optical glass using thin diamond wheels, 321
Transfer of surface texture from silicon nitride rolls to stainless steel wire in cold-rolling, 394
Wear resistance
Abrasive wear resistance of boronized carbon and low-alloy steels, 352
Welding
Practical numerical analysis of a crack near a weld subjected to primary loading and hydrogen embrittlement, 1
Welding pressure
A non-steady state FE analysis of Al tubes hot extrusion by a porthole die, 223
Welding repairing
Stress corrosion cracking sealing in overlaying of Inconel 182 by laser surface melting, 330
Wettability
Effects of gas composition during plasma modification of polyester fabrics, 40
Wiping die bending
Optimisation of springback predicted by experimental and numerical approach by using response surface methodology, 101
Wire rolling
Transfer of surface texture from silicon nitride rolls to stainless steel wire in cold-rolling, 394
Wood
The machining properties of some hardwoods and softwoods naturally grown in Eastern Black Sea Region of Turkey, 315

XPS analysis
Fabric surface properties affected by low temperature plasma treatment, 172
X-ray analysis
Performance enhancement through microwave irradiation of K20 carbide tool machining Al/SiC metal matrix composite, 185
